

AMERICAN WOOD COUNCIL

December 2023

ERRATA
to the 2022 Edition of
Fire Design Specification (FDS) for Wood Construction

(All prior PDF versions)

Page **Revision**

27 Revise the following text (shown in red strikeout and underline) in 3.3.1.5:

3.3.1.5 *Intersections and abutting edges of exposed wood cover: Intersections and abutting edges between* ~~Between~~ wood members and wood cover or between wood cover elements shall be designed in accordance with 3.2.4. Additional protection shall be provided at gaps, as necessary, to ensure that the wood cover provides the required protection.
