to the 2021 Edition of  
***Special Design Provisions for Wind & Seismic (SDPWS) with Commentary***

(PDF versions prior to 06-22-22 and printed version dated 12-21)

**Page**   **Revision**

45   Add the following text (shown in red underline) to the last sentence in 4.4.2:

The LRFD factored uplift resistance shall be determined by multiplying the tabulated nominal unit uplift capacity in Table 4.4.2 by a resistance factor,  $\phi_z$ , of 0.65.
