

ERRATUM

to the 2024 National Design Specification (NDS) for Wood Construction

(All prior PDF and print versions)

Figure 5F is revised as shown below - to be consistent with NDS provisions for compression side notching of structural glued-laminated timber in 5.4.5.2, which states that “Compression side end-notches shall not extend into the middle 1/3 of the span nor more than $3d_n$ from the end of the member.”

Figure 5F – Compression Face Notch and Taper Cut Limitations for Glulam Beams
